Acquisition Workforce Demo Project Position Requirements Document

I. Organization information:

Position is located in the Engineering Directorate, Project Support Group, Program Executive Office, Simulation, Training and Instrumentation (PEO STRI). Duty station is the U.S. Joint Forces Command, Suffolk, VA.

II. Position information:

Interdisciplinary, NH-***-IV

Opt: Lead General Engineer, 0801 Opt: Lead Computer Engineer, 0854 Opt: Lead Electronics Engineer, 0855 Opt: Lead Computer Scientist, 1550

III. Duties:

The incumbent serves as a Senior Technical Advisor on the Commander's staff at the Joint Warfighting Center located in Suffolk, VA under the program sponsorship of the DMSO Director. The Senior Technical Advisor assists and advises the host command in the identification of solutions to technical and programmatic issues that have a critical impact on transformation, experimentation, joint training, interoperability, and force provision and serves as the primary interface between the command and the DMSO in implementing solutions

1. Plans, organizes and directs complex development programs in the assigned area of simulation, training, and/or instrumentation. Develops and oversees the implementation of long range technical development plans in the assigned area in support of future modeling and simulation, and/or instrumentation programs. Supports the Director's objective to maintain continuous surveillance of engineering technology, trends and standards with regard to modeling and simulation efforts to ensure the PEO is positioned competitively in a market where investment funding is carefully scrutinized. Coordinates with Army and Department of Defense (DOD) organizations on the assigned programs/initiatives, and makes recommendations to the Director, Deputy Directors and Chief Scientist on technology initiatives that PEO STRI should address.

- 2. Serves as the Chief Engineer.Plans and coordinates the efforts of a team of simulation architecture and experimentation specialists. Provides technical direction and leadership including setting goals and objectives, planning for professional development, and allocating resources for project execution.
- 3. Serves as subject matter expert in one or more of a variety of specialty areas including SMART development, simulation tools & technologies, information management & data collection, databases, analysis and After-Action-Review (AAR) systems. Makes final decisions on controversial technical issues and problems cutting across organizational lines. Maintains high-level contact with key military and private industry officials for the purposes of continuous improvement to development capabilities. Represents JFCOM at project-related meetings and conferences with representatives of DA and DOD organizations, academia and private industry.
- 4. Supports Project Managers during concept formulation, development, production, fielding and post deployment phases of the acquisition life cycle. Responsible to the Project/Product Managers for technical oversight and direction for the development, representation and interoperability of products for any assigned live, virtual or constructive acquisition projects. Coordinates with Program Managers/Project Directors and matrix organization to ensure that technical issues have been appropriately considered in the acquisition plans for projects assigned. Provides the link between the technology investments and potential future needs of acquisition programs. Responsible for facilitating technology transition from the technology programs into appropriate acquisition business areas. Mentors junior engineers and looks for re-use opportunities.

Team Leader Responsibilities

Distributes and balances work based upon priority, skill requirements, and level of difficulty. Discusses work in process, answering questions from team members concerning procedures, directives, policy, etc., as well as technical subject matter related questions. Incumbent periodically meets with supervisor to discuss and/or provide specific recommendations related to team members performance appraisal, disciplinary actions, incentive awards, specific training needs, personnel assignments, and TDY travel.

Incumbent personally handles problems affecting the team and specific individual complaints that can be resolved through face-to-face discussion.

Performs other duties as assigned.

Critical Acquisition Position

"This is a Critical Acquisition Position. Unless specifically waived by the appropriate Army official, (i.e., the Director of Acquisition Career Management, the Army Acquisition Executive, or the Secretary of the Army) or if the employee is "grandfathered" under 10 U.S.C. 1736(c)(1), the following are statutorily mandated requirements (Reference: 10 U.S.C. 1733 and 1737):

- (1) Selectee must be a member of an Acquisition Corps at the time of appointment.
- (2) Selectee must execute, as a condition of appointment, a written agreement to remain in Federal service in this position for at least three years. In signing such agreement, the employee does not forfeit any terms or conditions of employment."

IV. Factors:

Factor: 1. - Problem Solving

Level IV.

Work is timely, efficient, and of acceptable quality. Completed work meets project/program objectives. Flexibility, adaptability, and decisiveness are exercised appropriately.

Defines, establishes, and directs organizational focus (on challenging and highly complex project/programs). Identifies and resolves highly complex problems that cross organizational boundaries and promulgates solutions. Resolution of problems requires mastery of the field to develop new hypotheses or fundamental new concepts. Assesses and provides strategic direction for resolution of mission critical problems, policies, and procedures. Works at senior level to define, integrate, and implement strategic direction for vital programs with long-term impact on large numbers of people. Initiates actions to resolve major organizational issues. Promulgates innovative solutions and methodologies. Works with senior management to establish new fundamental concepts and criteria and

stimulate the development of new policies, methodologies, and techniques. Converts strategic goals into programs or policies.

Factor: 2. - Teamwork/Cooperation Level IV.

Work is timely, efficient, and of acceptable quality. Personal and organizational interactions exhibit and foster cooperation and teamwork. Flexibility, adaptability, and decisiveness are exercised appropriately.

Leads/guides/mentors workforce in dealing with complex problems. Solves broad organizational issues. Implements strategic plans within and across organizational components. Ensures a cooperative teamwork environment. Leads/guides workforce in achieving organizational goals. Participates on high-level teams. Is sought out for consultation.

Factor: 3. - Customer Relations Level IV.

Work is timely, efficient, and of acceptable quality. Personal and organizational interactions enhance customer relations and actively promote rapport with customers. Flexibility, adaptability, and decisiveness are exercised appropriately. Leads and manages the organizational interactions with customers from a strategic standpoint. Works to assess and promulgate political, fiscal, and other factors affecting customer and program/project needs. Works with customer at management levels to resolve problems affecting program/projects (e.g., problems that involve determining priorities and resolving conflicts among customers' requirements). Works at senior level to stimulate customer alliances for program/project support. Stimulates, organizes, and leads overall customer interactions.

Factor: 4. - Leadership/Supervision Level IV.

Work is timely, efficient, and of acceptable quality. Leadership and/or supervision effectively promotes commitment to mission accomplishment. Flexibility, adaptability, and decisiveness are exercised appropriately.

Establishes and/or leads teams to carry out complex projects or programs. Resolves conflicts. Creates climate where empowerment and creativity thrive. Recognized as a

technical/functional authority on specific issues. Leads, defines, manages, and integrates efforts of several groups or teams. Ensures organizational mission and program success. Fosters the development of other team members by providing guidance or sharing expertise. Directs assignments to encourage employee development and crossfunctional growth to meet organizational needs. Pursues personal professional development.

Factor: 5. - Communication

Level IV.

Work is timely, efficient, and of acceptable quality. Communications are clear, concise, and at appropriate level. Flexibility, adaptability, and decisiveness are exercised appropriately.

Determines and communicates organizational positions on major projects or policies to senior level. Prepares, reviews, and approves major reports or policies of organization for internal and external distribution. Resolves diverse viewpoints/controversial issues. Presents organizational briefings to convey strategic vision or organizational policies.

Factor: 6. - Resource Management

Level IV.

Work is timely, efficient, and of acceptable quality. Resources are utilized effectively to accomplish mission. Flexibility, adaptability, and decisiveness are exercised appropriately.

Develops, acquires, and allocates resources to accomplish multiple project/program goals. Formulates organizational strategies, tactics, and budget/action plan to acquire and allocate resources. Optimizes, controls, and manages all across projects/programs. Develops and integrates innovative approaches to attain goals and minimize expenditures.

Incumbent must be able to obtain and maintain a Secret security clearance.

May be required to travel within the U.S./overseas by commercial aircraft.

KNOWLEDGE, SKILLS, AND ABILITIES (KSAS) FOR QUALIFICATION PURPOSES.

Expertise in all areas associated with the development and integration of state-of-the-art engineering concepts within modeling and simulation and training systems. These include SMART development, simulation experiment tools & technologies, information management & data collection, databases, configuration management, databases, exercise setup, analysis and After-Action-Review (AAR) systems.

Expertise in a specific specialized area of technology and development such as:

Embedded Simulation
Semi-Automated Forces
Visual Systems
Terrain Data Bases
Test and Training Instrumentation Systems
Constructive Simulation Systems
Virtual Simulation Systems

Etc.

Broad expertise in software acquisition management, software development methodologies and software engineering processes

Experience applying Department of Defense (DOD) materiel acquisition processes to support the acquisition of simulations, simulators, training and instrumentation systems

Expertise in applying current and evolving engineering technologies

Ability to perform market surveys, risk analysis, trade-off studies, cost estimates and reliability, availability, maintainability (RAM) analysis

Ability to provide technical advice on the conceptual design of simulations, simulators, training and instrumentation systems required to support complex military equipment or systems

Skill in Systems Engineering

Ability to lead a team of multi-talented engineers to successful completion of a project supporting research and

development, acquisition, fielding and lifecycle management initiatives

Skill in coordinating efforts of industry and multiple Army commands in fielding products that meet the needs of all customers

Ability to effectively communicate, both orally and in writing, to a wide range of audiences

Ability to interact well with customers within and outside PEO STRI, management and team members

Knowledge of policies, programs, organizations, functions, resources, and legislation affecting the program(s) and the organizations studied or served, and related customers, functions, resources, and users

Ability to plan and execute complex, multi-faceted projects within established financial and time constraints

Knowledge of current modeling and simulation principles, techniques, processes, regulations, and policies

Knowledge of acquisition, development, fielding and life cycle support of simulations, simulators, training and instrumentation systems
